

The Every Ball Counts® Assessment Report

Used by 8 of the Top 25 Players including the FedEx Champion

The EBC Assessment Report serves as an MRI of your Scoring Average

With the EBC Report:

- Access the same stat data that PGA TOUR players receive from ShotLink
- Utilize this data to increase your earnings and ranking
- Design a measurable practice plan to achieve your goals

Compare your skills against PGA TOUR players.

- 2017 Web.com graduates go through the EBC Assessment, which provides the same data as the PGA TOUR player receives through ShotLink.
- Players will see their results for specific skills and see how a change in that skill set will enhance scoring average and earnings.

Player and Coach now have a precise roadmap to lower scores.

EBC has developed a proprietary algorithm that looks at 900 data points from ShotLink. Once a player has their “MRI” of how they comprise their scoring average they can see where they need to improve. Coach and player can put together a measurable practice plan to improve these skills, which will lead to lowering your scoring average.
